

Extension of a condensate polishing plant for a paper mill

Condensate polishing line with resin trap

Condensate polishing line

Customer: Paper mill
Procedure: Filtration / ion exchange
Capacity: 85 m³/h
Year of realisation: 2010
Specialities: Extension of an existing condensate polishing plant, with a further cartridge filter for a prefiltration and a second fully automatic condensate polishing line, consisting of cation exchanger and anion exchanger as fluidised bed system

Prefiltration by cartridge filter

Anion exchanger
